### **DETAILED ACTION**

1. Claims 1-27 are pending.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 7-9, 16, 18, and 27, drawn to an ES cell.

Group II, claim(s) 1-3, 5, 7-9, 16, and 18, drawn to primordial germ cells.

Group III, claim(s) 1-3, 6-9, 16 and 18, drawn to a hematopoietic stem (HSC).

Group IV, claim(s) 1-3, 6-9, 16, and 18, drawn to a neuronal stem cell.

Group V, claim(s) 1-3, 6-9, 16, and 18, drawn to a mesenchymal stem cell.

Group VI, claim(s) 10-12, and 15, drawn to a method of isolating ES cells.

Group VII, claim(s) 10-12, and 15, drawn to method of isolating primordial germ cells.

Group VIII, claim(s) 10-12, and 15, drawn to a method of isolating HSC.

Group IX, claim(s) 10-12, and 15, drawn to a method of isolating neuronal stem cells.

Group X, claim(s) 10-12, and 15, drawn to a method of isolating mesenchymal stem cells.

Group XI, claim(s) 13 and 17, drawn to a chimeric animal.

Group XII, claim(s) 14, drawn to a method of making a chimeric animal with ES cell dependent on glycolysis.

Group XIII, claim(s) 19-23, drawn to isolated stem cells that stain with JC-1 and are sensitive to inhibitors of MDR targets and a method of identifying said cells.

Art Unit: 1632

Group XIV, claim(s) 24-26, drawn to a method of switching ES cell between two populations and resultant cells.

2. The inventions listed as Groups I-XIV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

A) The invention has no special technical feature that defined the contribution over the prior art, or

B) Unity of invention between different categories of inventions will only be found to exist if specific combinations of inventions are present. Those combinations include:

- 1) A product and a special process of manufacture of said product.
- 2) A product and a process of use of said product.
- 3) A product, a special process of manufacture of said product, and a process of use of said product.
- 4) A process and an apparatus specially designed to carry out said process.
- 5) A product, a special process of manufacture of said product, and an apparatus specially designed to carry out said process.

The allowed combinations do not include multiple products, multiple methods of using said products, and methods of making multiple products as claimed in the instant application, see MPEP § 1850.

### **Species Election**

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

MDR inhibitors: verapamil, reserpine, cyclosporine A.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 1632

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Both dependent form.

The following claim(s) are generic:

MDR inhibitors: 25 and 25.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The somatic stem cells are express different markers and differentiate into different lineages. The MDR inhibitors have different chemical properties and function by biologically different mechanisms.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
